Agape Total Childcare Center, which now includes an orphanage and school, in Mukono, Uganda, must build a boys' dormitory! To reach its goal of being self sustaining, Agape opened a Christian secondary school, where day and boarding students can attend. A boys' dorm will house not only Agape children, but also boarding students who pay tuition. The temporary housing for the boys is too small and does not meet the governmental requirements for accreditation.

Be part of Agape! The staff and students are already making adobe bricks as their contribution to the dormitory. Agape needs \$75,000 for the other materials and labor required to complete this building in time for the 2015 school year, which begins in February!

Please designate donations *Agape—Dorm*.
